INTERNATIONAL WOMEN'S DAY

I encourage you to pursue your dreams and find your own path to happiness. As women, we may face additional obstacles, but we can tap into our inner strength and achieve everything we set out to do, making along the way a positive change without renouncing our values and principles.

“Don't listen to bosses saying women can't be leaders if they don't behave like men. Be authentic. If your bosses don't value you, find a firm that does or found your own. Be courageous and stay true to your values.”

“Many of today’s most admired entrepreneurs, lawyers and leaders are women. They have overcome challenges and made their mark on the world. Their experiences inspire each of us to achieve our ambitions and dreams in life and work. We should continue to work with passion, enthusiasm, and discipline; promote ourselves; and be ready to speak up and question the status quo.”

In the Chilean legal market it is possible to recognize efforts to provide visibility to female leadership in the legal profession, but it is not enough. In this regard, the efforts made by the Chilean Bar Association is noteworthy, which through its Commission of Women Lawyers has published a Directory of Experts, in order to promote and recognize the relevant female experience in the practice of the profession. This type of initiative should encourage other entities to assume the duty of recognizing the relevant experience of women lawyers in the different disciplines in which they practice

“A law firm with a greater gender equality performs better in all metrics. Some important steps have been taken towards equality in the legal sector, but there is still some way to go. With a strong investment in gender equality education and the promotion of equal opportunities, based on meritocracy, I believe we will see more women in leadership positions.”

“When we are young, we are always taught to dream. But what about when we grow up? Dreams are what drive us to be better both in our work and as individuals, women, and citizens of the planet. Remember to dream as big, bright and colorful as your seven-year-old self would.”
